

# Appraising Progress of WHO's COVID-19 Technology Access Pool (C-TAP)

**Luis Villarroel**  
**Director de la Corporación Innovarte**

# ISSUES

GARDENERS AND NETWORKS  
INCENTIVES  
INFORMATION

# GARDENERS

( responsable / oficial)

- 
- a) It needs a gardener in each country, research center, technology transfer office.
  - b) We need to create a network of gardeners that can share best practices, inform stakeholders and the public what has to offer and and how participate.
  - c) CTAP implementation has a strong component of intellectual property, licensing and technology transfer element so is critical engage IP offices , as well as Ministries of Ciencias along Health agencies.

# INFORMATION

- a) Not a single web page explaining it in spanish nor in WHO nor in south american countries.
- b) We need an easy to find database with the knowledge made available. ( make it a relevant source)
- c) Models of forms of commitments, best practices. guidelines from WHO for national responsible agencies.

# INCENTIVES

Incentives for Governments, research centers and pharmaceuticals to disclose and commit knowledge to the pool.

- a) clear linkage with funding through ACT-A ( carrot) and network of the pillars.
- b) recognition to those who contribute to C- TAP
- c) mandates from the participating governments with relation to publicly funded research.
- d) Establish the obligation of make commitments to the pool as a requirement to use its content. ?
- e) To subject to copyleft principles for derivative works coming from the knowledge taken from the pool ?
